

# New MIS System: AVANT, New APEX Spine System Cases & Hands-On Workshop

## AVANT MIS System

The AVANT MIS System combines the advantages of a minimized surgical approach with the added benefit of simplified instrumentation and exceptional ergonomics. This system will feature a pre-attached Extended Screw Tulip, which guides rod and set screw insertion, eliminating the need for MIS tube assembly. With the ongoing hard work and dedication of our team, we are getting closer to the AVANT MIS System release date next quarter.

## New APEX Spine System Cases

The new APEX Spine System implant & instrument case configurations that were released last July are now available worldwide! The new configuration includes several new instruments & implants and new tray/case layouts for OR convenience and streamlined processing.

Contact us for more information or to see our new brochure!

## Hands-On Workshop

SpineCraft is preparing for participation in the 3rd Spine Deformity Solutions Workshop: A Hands-On Course Presented by SRS in Burr Ridge, IL October 9-11. We will have two lab sessions featuring: 1) MIS lumbar TLIF and Percutaneous Pedicle Screws T12-S1 and 2) Open Lumbo-Sacral Techniques, Including: PSO, Sacro-Iliac Fixation.
