

New Deformity Correction System: SpineCraft ASTRA Spine System

SpineCraft

SureGrip Interface

Unique instrument/implant interface provides excellent stability and rigid connection for accurate secure maneuvering

Rod Adaptability

Advanced metallurgy, precision engineering, and a proprietary manufacturing process ensure a high level of performance

Dual-lead Thread Pattern

Dual-lead thread with optimized cancellous and cortical zones

SpineCraft announces its next generation of deformity correction technology.*

The ASTRA Spine System is optimized for use with advanced instrumentation developed specifically for complex spine procedures. The ASTRA implants and instruments are simple and precise, providing surgeons with exemplary reliability. The implants are designed with proven technology that allows intraoperative flexibility to change rod diameters and material types while maintaining a low profile and providing exceptional strength.

*Pending regulatory approval
