

# Double Lead Screws, New MIS System, & Success at Hands-On Workshop

## New: APEX Spine System Double Lead Thread Screws

The new APEX Spine System Double Lead Thread Screws are scheduled for release in select international markets in January 2015. Release in the US market is planned shortly after.

## AVANT MIS System

The AVANT MIS System combines the advantages of a minimized surgical approach with the added benefit of simplified instrumentation and exceptional ergonomics. This system will feature a pre-attached Extended Screw Tulip, which guides rod and set screw insertion, eliminating the need for MIS tube assembly. With the ongoing hard work and dedication of our team, we are getting closer to the AVANT MIS System release date.

## Hands-On Workshop

SpineCraft participated in the 3rd Spine Deformity Solutions Workshop: A Hands-On Course Presented by SRS in Burr Ridge, IL October 9-11. We presented our MIS lumbar TLIF and Percutaneous Pedicle Screws T12-S1 as well as our Open Lumbo-Sacral Techniques, Including: PSO, Sacro-Iliac Fixation.
