

SpineCraft Announce Release of VELOX ACP System

SpineCraft

The new VELOX Anterior Cervical Plate System coming Q2 of 2014

SpineCraft's VELOX Anterior Cervical Plate System has been designed to meet wide clinical needs by offering a plate/screw construct with integrated automatic locking mechanism and the choice of fixed or variable angle screws for ease of implantation in different pathologies.

The VELOX Anterior Cervical Plate System will be available for distribution internationally and in the US.
